

With construction to begin in 2007, the CCAC will become a model Inter-Urban Development (IUD); sustainable, defensible, and survivable. With an intermixture of advanced technologies and a top-down Green System of Systems (GSOS) approach, the overlying template is one of internal balance within the lived environment, harmoniously renewing itself from above and below.

The Petroleum Consolidation Processors

(PCP's), slowly extracting the rich reserves beneath the site, will sustain the Community's need for Petro-Chemically Originating Kevlates (PCOK's), the base compound for JohnKo's revolutionary new superplastic, JP-424. And the JohnTek© Bio-closure Skin (JTBS) which encloses the entire complex, will gather solar emissions for fuel, while protecting the Community from harmful alien influences. Imagine the need for new tools and creative materials satisfied locally under a sky of our own control...

CRITICAL
CONTROL
AGRARIAN
COMMUNITY

Mankind has long attempted to create a perfect society. Here at JohnKo, we intend to succeed. The Critical Control Agrarian Community (CCAC) will be a Fully Enclosed, Ecologically Friendly, Sustainable Environment (FEEFSE), drawing its resources solely from the 17 acres upon which it sits.

The plan also calls for numerous areas of the site, currently under the influence of concrete, to be re-agricated, and incorporated into a Graze-Grow-Frolic

Network (GGFN), where the residents can raise their own fruits, vegetables, and livestock. This purely organic domain is intended to act as a test bed for future large-scale endeavors on Earth and beyond.

The Spaciously Appointed Grounds (SAG's) will include facilities dedicated to such important areas as Creativity Expansion, Internal Media, Knowledge Collation and Implementation, Personal and Community Health, and a deluxe 200 person WhirlyTub© by JohnKo's JohnPoolz™ Division.

The twenty-year cycle proposed will consist of a complete hermetic sealing with 250 selected individuals chosen in accordance with their specific skills and personalities. The Non Hierarchical Community Construct (NHCC) is intended to catalyze Citizens through the common

goal of simple survival.

- Are you ready to embark on a Brave New Experiment (BNE) with us?
- Do you have what it takes to become a Critical Control Activant (CCA), working within the NHCC to harvest the riches of the GGFN beneath the green JTBS?
- Are you willing to sacrifice two decades to help set the stage for the success of future FEEFSE's?

If your answer is an exuberant "Absolutely!!" then check out our application process at:

www.johnko.biz

The selection process begins today. Perhaps you will be one of the Ecologically Elite Korps (EEK). CCAC awaits...
